

# What if I can't get into my Robinhood account? {(FAQ"CoNtAcT)}

What if I can't get into my Robinhood account? can happen when login credentials are lost or when there are technical difficulties. The first step is to double-check your email and password to make sure they are accurate. If you cannot remember your password, use the "Forgot Password" option and follow the instructions sent to your registered email. Remember to check your spam or junk folder as reset emails sometimes land there. If two-factor authentication is enabled, you will need your phone or authentication app to verify your identity.

Many people ask **What if I can't get into my Robinhood account?** when they no longer have access to their registered email or phone. In these situations, the best approach is to contact Robinhood support and provide proof of identity such as a government-issued ID. Patience is important because account recovery may take a few days depending on your account status. Checking your email for messages from Robinhood about restrictions or inactivity can provide helpful information. Using a web browser or updating the app often fixes technical login issues.

After you regain entry, make sure to update your account information including email, phone number, and security settings. Turning on two-factor authentication helps protect your account and ensures your login credentials remain secure. Following these steps allows you to confidently answer **What if I can't get into my Robinhood account?** and continue managing your portfolio. Proper recovery keeps your account safe and accessible whenever you need it.
